## Path for the Blind

To walk the world without eyesight is a challenge for those who are not used to it. There is a lot to discover here. For the participants, this can be a real adventure

## Framework

Group size: 5-20 people
Age: 8+
Duration: 30-45 minutes
Location: Forest, outside (reasonably varied area)

## Materials needed

- Rope/s (for a distance of 50-100m)
- Eye pads

## Idea

In a varied section of land, a rope is stretched at shoulder height of the participants.
The rope can go over small pits, obstacles, rocky or sandy areas, etc.
The participants are blindfolded. One by one, with a sufficient distance, they are led to the rope, which they have to follow until the end.

The participants are blindfolded

## Nodes

Nodes can be inserted at some points on the rope to draw the participant's attention to a special feature. For example, here they can feel something special or there is a special difficulty to overcome.

## Note

It gets more interesting when participants don't see the path beforehand.
