

## Top projects 95

"The project method is the method of methods," says M. Golpelwar, an expert in youth work.

The top projects have been tried and tested in practice and have been well received in the relevant teen clubs, teen groups of the Jungschar etc.

## General information about the project method

For leaders in children's and youth work it is certainly one of the most beautiful tasks to promote and use the gifts that God as Creator has given to every human being. It is truly (Lord)ly to see how the Lord has placed them in individual human lives and very unfortunate how much lies fallow that could actually be used for the good of all.

### Project Features:

1. ladder-structured projects
2. self-structured projects
3. self-interest or third-party interest projects

## Individual articles

### Basic Project Method

Top Project 1:
