Rodeo

Rodeo on sprung wooden trestle with saddle for teen group events in the village / neighborhood

Basic idea / Goal
With a spring-loaded wooden buck with saddle, a bucking horse is imitated. One sits in the saddle and the other jogs behind. The goal is to stay in the saddle as long as possible.

Duration / Period / Effort
The effort is quite big, because building, transporting and setting up takes quite a lot of time.

Material needed
Beams, very strong truck spring, plastic barrel, western saddle, enough mats

Cost
Beam approx. Fr. 100.- borrow saddle and truck spring via relations

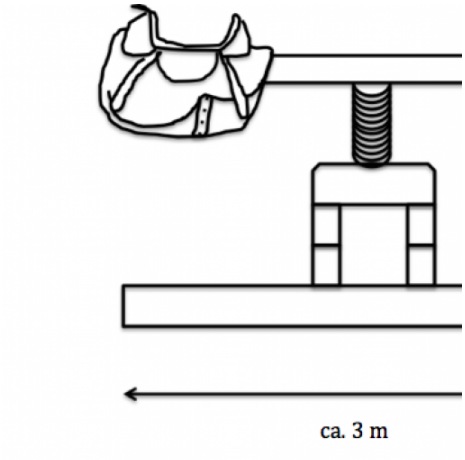

Execution of the project
see construction sketch

The whole frame needs to be very heavy and hold well! (Bolt it well) The attachment of the spring is very tricky. Best to ask a mechanic

Important notes
The wooden trestle and the area around it (where you fall) need to be very well padded with mattresses or gym mats. Running the whole thing takes a lot of stamina. It is advisable to have enough ladders ready.

Application
Suitable for village festival or Chilbistand
