Make soap bubble device yourself

Here you will find a tutorial on how to make a simple bubble device yourself. This can be used for competitions, as it is possible to make long bubble snakes (more than 1m long).

Material

- 1 tube (approx. 10-15cm)
- 1 scrap of fabric (e.g. from a sock)
- 1 rubber band

Construction Instructions

Place the scrap of fabric over the pipe.

||

Fasten the scrap of fabric with a rubber band.

Images

Hints

- To create a soap bubble, simply dip the scrap of fabric into the soapy water and blow gently into the tube from behind.
- When blowing through the tube, it is important to **not blow too hard**. That's why this device is also good for smaller children, as it doesn't require much blowing.
- For the soapy water, you can follow this guide:make bubble lye
