

## Paramedic game

### Material

- 1st aid material
- Make-up material for injuries
- Radio equipment
- Whatsapp chat
- Local map

### Preparation

Ideally, learn or brush up on 1st aid theory.

||

Build teams of 2 or 3

||

Each team will be given a walkie-talkie and cell phone

||

Save leader's phone number under "Operations Center"

||

Brief introduction to radio discipline

||

Set up secret leader chat for all emergency patients.

||

Emergency patients get into position at various locations and report their location to ladder chat. Simple variation: known location features. Advanced variant: location information with coordinates only.

## Gameplay

The location of an emergency is announced by radio.

||

The first team to arrive at the emergency reports this by radio and may treat the emergency in peace. Other teams must go out of sight.

||

If the treatment is good enough, there is a point for the team and the "patient" changes location. The patient determines if the treatment was good enough and reports it in ladder chat.

||

If the treatment is inadequate, the emergency is passed through again, and another team gets to try.

||

Each emergency arrives multiple times, and multiple emergencies may arrive in quick succession, so one team can't treat them all.

||

The team with the most successful treatments wins.
