Lamb and Wolf

How to play ?

A circle of people is formed - they are the guards.In the circle stands the "lamb" and outside the "wolf".The wolf's goal is to break through the guards and catch the lamb. The guards have to hold on very tight and not let the wolf get through. In case he manages to get through the guards, they must quickly make a gap for the lamb to get out and keep the wolf inside. When the wolf catches the lamb the game is over and the players change...Details. Also if the players wish a second wolf can be added to make it more interesting.
