

Land art

Art in nature

Land art can be done almost anywhere in nature and you don't have to take almost anything with you.

Let off steam creatively using only natural materials.

The idea is to create a work of art in nature that you then leave there. You start by collecting materials: Leaves (in different colors & shapes) Sticks, bark Nuts Pine cones Flowers Grasses Berries The aim is to create a work of art with the available materials. a picture a pattern / mandala 3D model Garlands Mobile etc. there are no limits!!! if necessary, you can also take tree shears etc. with you if you plan it into the program. Land art can also be spontaneously integrated into the afternoon program. the aim is to leave behind an ephemeral piece of art that will bring joy to others. It is important to take a picture as a reminder, because you can't take it with you. Have fun and let your creativity run free.
