The Running Caterpillar

Materials needed: balloons, depending on the number of teams

Participants are divided into two teams (5–12 people). The teams form a line (with hands on shoulders or hips); the last person in each line receives a balloon attached to their pant leg. Within a marked-off area, the task for both teams is to pop the other team's balloon while protecting their own.

TIP: Make sure the leaders of the two lines are of the same gender.
