Game procedure

*The children should be divided into groups of approx. 2-5 children.
*The formed groups look for a place where they want to build their city.
*The children start building the city and can let their creative side run wild (they can choose the size of their buildings themselves). They can receive additional materials at various posts.
*An evaluation committee visits the built cities in certain time cycles (e.g. every 10-15 minutes) and evaluates them.
*At the end of the game, the group that has received the most points from the evaluation committee wins.
